

**Ready for
a new energy?**

A powerful new purpose.

Courageously tackling the greatest challenge of our time, to bring our world the energy it needs in the most responsible way ever imagined.

Helping us to define why we do what we do in a new way. Giving us a lens clearer than ever before to stride forwards through.

Expect us to take every step to boldly follow this path. We will measure every action, every investment and business decision against this.

We design, build and maintain the assets that power the world for today and make it future-ready for tomorrow.

Engineering & Consulting

- Field development planning
- Conceptual studies
- Pre-FEED / FEED
- Detailed engineering
- Brownfield engineering
- Asset integrity
- Process and facilities engineering
- Technical safety / loss prevention
- Late life management / decommissioning
- Low carbon solutions

Projects

- PMC
- EPCm
- EPC
- Engineering and procurement
- Construction management
- Construction services

Completions, Commissioning & Start-up

- Commissioning life cycle planning
- Pre-commissioning
- Commissioning and start-up
- Systems completions
- Intervention and Inspection services
- Operations readiness and assurance

Operations & Maintenance

- Operations and maintenance
- Turnaround and shutdowns
- Brownfield modifications
- Preservation services
- Process and production optimisation

Digital

- Visualisation
- Data integration
- Digital twin
- Asset management
- Immersive training
- Analytics and artificial intelligence

Supported by:

Training

- Latest technology
- Expert training
- Smart and efficient work practices
- Developing local talent

Engineering & Consulting.

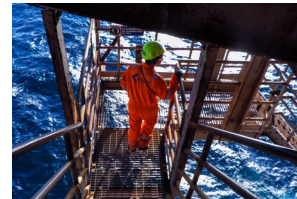

You're looking for solutions that create and sustain value. We deliver them.

A blend of practicality and innovation from initial concept and development to optimisation and maintenance.

Field development planning	Asset integrity
Conceptual studies	Process and facilities engineering
Pre-FEED / FEED	Late life management / decommissioning
Detailed engineering	Technical safety / loss prevention
Brownfield engineering	Low carbon solutions

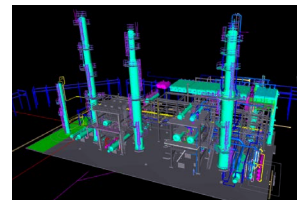

Our solutions deliver around the world.

Global Projects and Operations Framework Agreement, Global

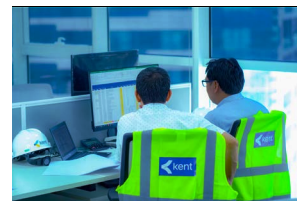

Operator	bp
Duration	Ongoing since 2020
Scope	Engineering and consultancy support services for onshore and offshore assets

Light Naphtha Disposition Project, United States

Operator	Total Petrochemicals and Refining USA, Inc.
Duration	Ongoing since 2020
Scope	FEED, Detailed Engineering and Procurement

Offshore Low-Pressure Operations, UK

Operator	Confidential
Duration	2017 to 2019
Scope	Technical consultancy. Assessed feasibility of Low-Pressure Operations, provided operating envelope and identified options to debottleneck

Projects.

Reliable. Safe. Service Excellence.

It's what our reputation to deliver is built on. It's why our teams go above and beyond for our customers. Whether it's just part of a project or the full lifecycle.

PMC	Engineering and procurement
EPCm	Construction management
EPC	Construction services

When our customers ask, we instantly listen and respond. It's that swift operational reaction that has created many successful projects and partnerships:

Baytown Sustaining Capital Alliance, USA

Operator	ExxonMobil
Duration	Ongoing since 1966
Scope	Front-end development, project management, engineering, procurement and construction services

Framework Agreement for PMC Services for Onshore Major Projects, UAE

Operator	ADNOC
Duration	Ongoing since 2018
Scope	Project Management Consultancy (PMC) Services, FEED and engineering services, technical assistance

Gorgon Project, Australia

Operator	Chevron Australia
Duration	Ongoing since 2009
Scope	Turnkey engineering, procurement and construction (EPC), mechanical, electrical, instrumentation, commissioning (MEIC), ongoing telecoms O&M and consultancy support

Completions, Commissioning & Start-up.

Time and cost-effective.

Keywords we appreciate. And know you will too. Because, as the industry's leading commissioning contractor, with decades of knowledge and experience, we deliver on all your requirements.

Commissioning and start-up	Pre-commissioning
Commissioning life cycle planning	Intervention and Inspection services
Systems completions	Operations readiness and assurance

Our global service agreements with major international operators, and successful projects around the globe, speak for themselves:

Future Growth Project Systems Completion, Tengiz, Kazakhstan

Operator	TCO (TengizChevroil)
Duration	December 2019 - April 2023
Scope	Gathering & 3GI Multi-disciplinary completions and commissioning

Western Canada Major Projects, Canada

Operator	Imperial Oil Ltd
Duration	2012-2016
Scope	Completions and commissioning

Gulf Coast Growth Ventures Project, USA

Operator	ExxonMobil & SABIC JV
Duration	Ongoing since 2020
Scope	Integrated commissioning, systems completion and start-up

Operations & Maintenance.

In our business, certainty is everything.

We help extend your assets' lifecycle, reduce risk and operate in cleaner ways than ever before. And our Value Delivery Platform uses the latest digital technologies and best practices to realise project cost savings.

Operations and maintenance

Turnaround and shutdowns

Brownfield modifications

Preservation services

Process and production optimisation

Rest assured, our team has it under control on projects around the world:

Shell Pernis & Moerdijk, The Netherlands

Operator

Shell Nederland

Duration

Ongoing since 2015

Scope

Multi-disciplinary maintenance, modification projects and turnarounds

Sakhalin-1 project, Far East Russia

Operator

Exxon Neftegas Ltd

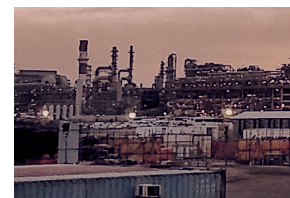

Duration

Ongoing since 2008

Scope

Multi-disciplinary maintenance & engineering support services

Qatar Shell GTL , Qatar

Operator

Qatar Shell

Duration

Ongoing since 2013

Scope

Multi-disciplinary maintenance & engineering support services

An industry in transition

The greatest positive change we can make today is to create change from within. In everything we do on our projects, in our industry, supporting and collaborating with our partners - leveraging the brilliant minds, efforts and spirit of our 12,000 wonderfully different and talented people in new ways. Not just in our focussed quest for renewables but in how we decarbonise the process to source oil and gas for the world's energy needs right now too. We choose both.

Working across the energy industry spectrum

Conventional energy

Onshore Oil

Offshore Oil

Infrastructure

Decarbonisation/
Emissions Reduction

Carbon capture,
utilisation & storage

Low Carbon & Renewable Energies

Health & Safety

The welfare of our people who work with us globally is a fundamental core value, it is our strongest belief that we will end every day at Zero. Zero harm to our people, planet, and assets. This includes both physical and psychological harm. It is critical to that aim that we establish environments where risk is understood and controlled. Where people feel safe to raise concerns and empowered to stop work if they feel it is not safe, without fear of retribution or negative connotations.

At Kent we believe positive outcomes are a result of a great culture and effective leadership where everyone owns the responsibility to be a custodian of safe outcomes.

“Safety is not just about compliance, it’s about understanding why people make the choices they make. At Kent we are leading the movement to empower people to make better choices.”

SUSTAINABILITY.

by Kent

Empowering people to prosper ● Supporting a thriving planet ● Living with purpose and principles

Our Sustainability Strategy

Courageously tackling the greatest challenge of our time, to bring our world the energy it needs in the most responsible way ever imagined.

Our Challenge

When it comes to making a positive impact for people and our planet we're doers, not talkers. We don't deal in idealistic visions. We face difficult truths with confidence and optimism. We harness our collective energy within to take action and create real-world change in a green-washed world. By empowering people to prosper, supporting a thriving planet, and living every day with purpose and principles, together we'll bring the world the energy it needs today and tomorrow in the most responsible way possible.

Pillar 1

Empowering people to prosper

We believe the meaningful change we all seek begins from within. We encourage a collective energy built on individual actions to create an inclusive, safe and prosperous world for our people & the communities in which we operate.

We're focussing on

Nurturing brilliant minds

We're attracting, educating and developing a smart, brave, agile workforce so that the brightest minds can create a better today, and an even brighter tomorrow.

Lifting communities

We're lifting the communities where we operate by employing local people and local suppliers, educating the next generation of talent, and providing donations and community development

Empowering our people

We're empowering our employees to prosper by providing them with the financial, physical, mental and emotional knowledge and support they need to thrive.

Pillar 2

Supporting a thriving planet

We're committed to being a compassionate catalyst for the energy transition. Addressing the wounds of yesterday, powering the world today and making it future-ready for tomorrow.

Accelerating the energy transition

We're using our agility and knowhow to help our clients break new ground in renewable energy, whilst rolling up our sleeves and tackling the tough work of decarbonising conventional energy sources from within.

Tackling climate change from within

We've looked within to create bold but credible science-led net-zero plans that focus on rapid, deep and achievable emission cuts for us, our suppliers and our employees.

Reducing our environmental impact

We're taking daily responsibility to reduce our use of plastic, waste and water, as well as raising awareness of key issues such as protecting and nurturing biodiversity.

Pillar 3

Living with purpose & principles

We know that talk won't cut it. As a business we take action, lead by example and always do the right thing. By putting our purpose and principles before profit we inspire trust and pride in our people, our clients & the communities we touch.

Leading by example

We're holding ourselves and everyone we work with to the highest standards. Because we know fair, transparent and ethical leadership is critical for the success of our company, our people and our planet.

Living our culture

We're encouraging every member of our worldwide team to play big, thrive on emotional agility and be upstanders, not bystanders. And we embed that culture into everything we do.

Thriving on inclusivity

We are one. And we include all. With thousands of wonderfully different employees spread all over the globe, we're committed to nurturing an inclusive, fair and equal culture.

Our foundations

Health, safety and security

Attraction and retention

Energy efficiency

Environmental policy

Tax policies

Due diligence

Employee satisfaction

Employee rewards and benefits

Sustainable procurement

Environmental compliance

Leadership structure

Remuneration

Employee engagement

Competence

Environmental Management System

Pollution prevention

Safeguarding data

Transparent disclosures
