

## MISSION

To provide products and ensure the integrity of equipment through engineering solutions and integrity assurance services to companies in the energy and industrial sector in general in Colombia, Latin America and the United States with quality, traceability, safety and timeliness in delivery times.

## VISION

As of 2024, we are recognized as key strategic partners in the energy and general industrial sectors for providing innovative and sustainable engineering solutions that ensure quality and safety in our clients' operations.

Our next objective for 2030 is to add value to our partners in the field of alternative energies by working jointly with our top global suppliers.

# Equipment Solution Group Colombia S.A. - Esgcol

We are an integral solution for Energy, Industrial Oil and Gas projects, with the highest state-of-the-art technology and with our philosophy of Quality.

## Integral Solutions

# DRILLING PERFORATION

Customer satisfaction is our strategic goal. ESGCOL supports our clients with any of their needs in the drilling area, starting from budgeting processes, engineering, manufacturing, fast deliveries, and reliability and service after the sale.

# OIL & GAS PRODUCTION

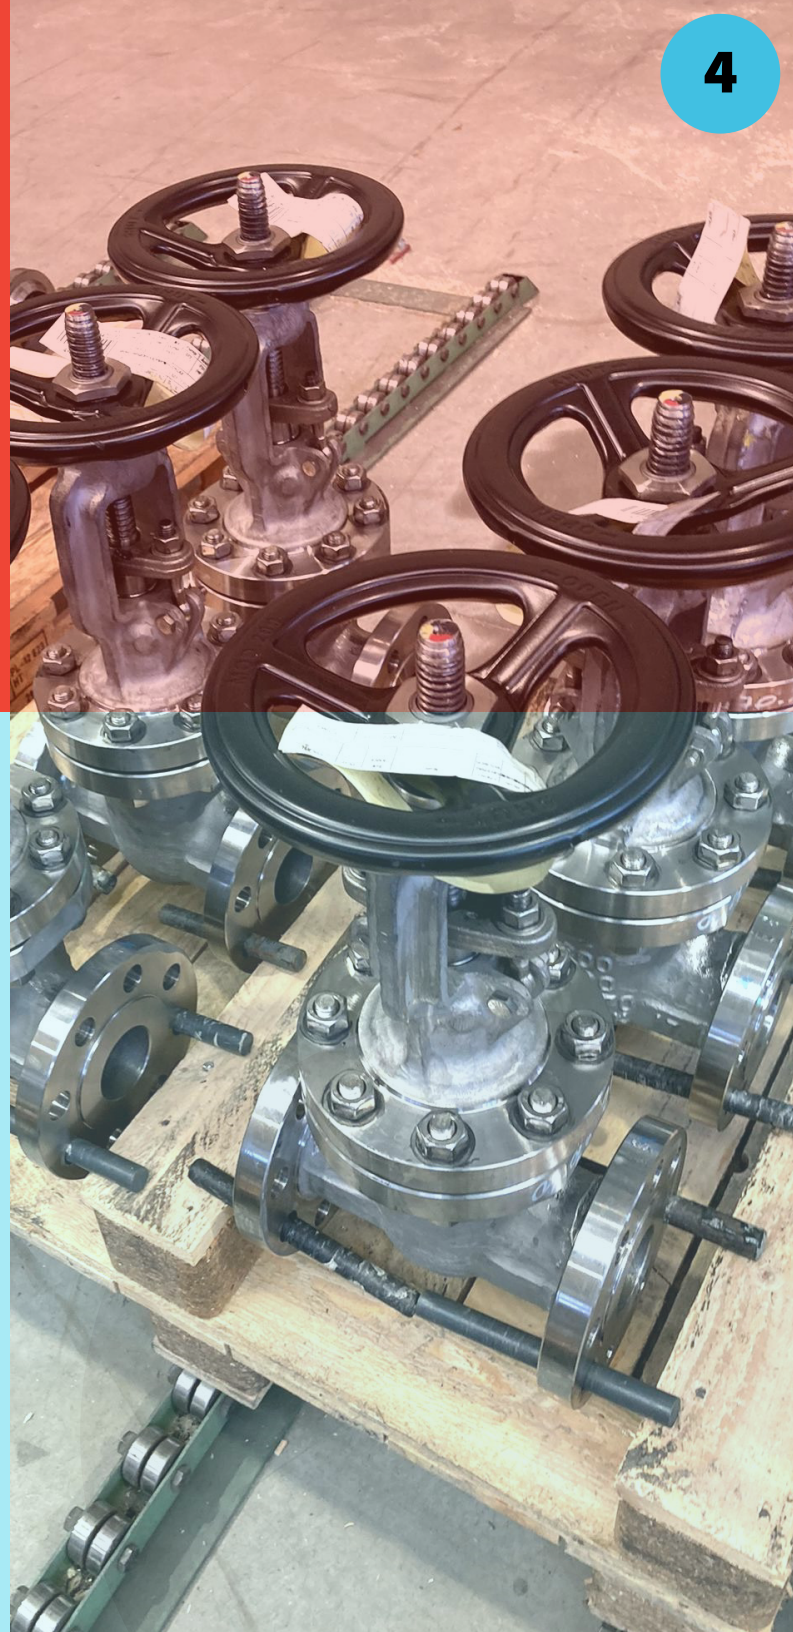

At ESGCOL, you will find the solution to your storage needs with our high-tech tank manufacturing. Additionally, in our production line, you will find fluid separation technology through of computational dynamic studies.

# PIPING, FITTINGS AND TRANSPORTATION

ESGCOL provides comprehensive solutions for your gas, oil, and new alternative technology transportation projects, ensuring the highest reliability through the world-class factories we represent.

Carry out your refining projects with EPCs that provide engineering, equipment manufacturing, and procurement for high-criticality needs, preventing typical accidents in refining processes. ESGCOL ensures 100% reliability.

Low emissions with our manufacturing of complete gas reduction and treatment systems, "CITY GATE STATIONS," as well as LAC units and automated SKID supplies for fuel delivery in hard-to-reach locations

group

# AUTOMATION

ESGCOL supports you with your automation projects, providing fast and efficient responses through our control rooms. We are the solution for remote automation where there are no energy sources.

ESGCOL is a PIONEER in delivering green, blue, and gray energy, modular production of ammonia and methanol, and energy transition projects such as CO2 recovery from Biogas and Power plants using renewable energy like Hydrogen.

## ALTERNATIVE ENERGY

# OFF SHORE

ESGCOL is supplying main manufacturer which is Leader in Contemporary Subsea Solutions. TRENDSETTER.

We deliver significant value to end users when no other competitor could meet rigorous cost, technology o schedule challenges.
